

Armin Asefi

Lead Software Engineer

Profile

I have over 9 years of experience in software development, with 6 of those years professionally focused on Laravel, React, and Android. I am proficient in PHP, Java, JS, TypeScript, and Python. I have worked with various databases such as MySQL, PostgreSQL, MongoDB, and Redis. I'm also skilled in Linux, Git, Docker, and CI/CD. I have the ability to analyze and develop cross-platform and team-based projects, and I always strive to work in a principled and efficient manner.

Education

- Bachelor in English Language & Literature**
Univertify of Birjand
Sep 2023 - Jan 2027

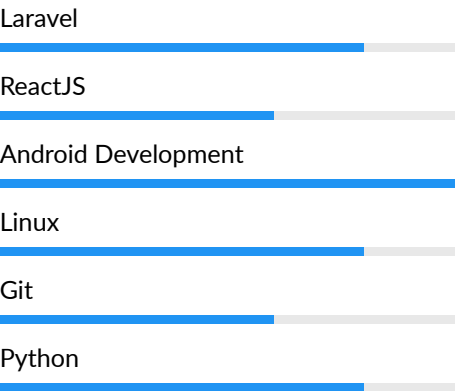

Employment History

- Tutor**
Maktabkhooneh & YouTube
Aug 2023
It's been about 3 years now that I've been producing educational videos on YouTube and, more recently, on Mektebkhune, focused on software development, algorithms, Linux, security, networking, and infrastructure, and I try to pass on what I've learned to others.

- Founder**
YadBarg (Bandar Anzali)
Mar 2025
YadBarg is a cross-platform startup that offers cloud-based note storage and task management system powered by AI. YadBarg's mission is to help users write with quality while keeping things simple, and to leverage AI for managing their tasks. Users can translate their saved notes into 17 world languages, summarize long texts, chat with their notes and ask questions, or change the tone of their writings. They can also create shared workspaces and collaborate seamlessly with friends or team/organization members within those spaces.
- Tech Lead**
Dizinet (Birjand)
Sep 2024 - Sep 2025
I was the tech lead for the Roozmozd project at Dizinet. At Roozmozd, we developed a WordPress plugin that updated WooCommerce product prices based on exchange rate fluctuations within specified time intervals. Then, building on that plugin, we developed a license sales panel, as well as an Android and desktop app for store managers.

- **Android Developer**

Sharjpay (Tehran)

Nov 2022 - Jan 2023

The SharjPay project was a platform for managing building-related matters such as monthly maintenance fee payments, resident communication, conducting surveys, and more. In this project, I implemented the Android app, which was fully integrated with the server.

- **Android & Backend Developer**

Azmoonyar (Rasht)

Apr 2021 - Oct 2022

I was responsible for implementing the Android application and the required backend for defining and holding online exams in the AzmoonYar team. Users with the teacher role could add different students to their user panel, and by creating an exam, the students could take the exams and view their results.

- **Fullstack Developer**

GeekHub (Bandar Anzali)

Jan 2022 - Jun 2022

I developed all of the GeekHub educational service. This project included various sections such as a admin panel, instructor panel, course panel, student panel, and a custom video player with E2E encryption, all of which were implemented using different languages and technologies.

Projects

- The complete list of projects is available at the link below.

Jun 2024

<https://0xdevii.github.io/>

Courses

- **Laravel Development**

TopLearn

Mar 2021 - Jul 2026

- **PHP MVC**

TopLearn

Jan 2021 - Apr 2021

Honors

- **IranSkills - Mobile Application Development**

Mar 2021 - Oct 2023

2 honorary diploma for the 6th and 4th place (2021–2022)

1 bronze medal (2023)
